SUMMARY

Computer Science graduate and full-stack developer skilled in TypeScript, React, Next.js, Node.js, and SQL. Shipped two production web applications end-to-end — from REST API and database design to responsive front-end interfaces. Seeking a junior software developer or data analyst role.

PROJECTS

Sideout | *Next.js, TypeScript, PostgreSQL, Supabase, Stripe, Twilio/WhatsApp*

- Built and deployed a production-grade operating system for a real pickleball venue, handling bookings, memberships, wallet credits, and operator dashboards across customer and admin surfaces.
- Engineered an API-first booking platform with transactional slot holds, conflict-safe reservations, and role-based access control on a PostgreSQL backend.
- Integrated Stripe Checkout and webhook-based payment processing with automated booking confirmation, payment reconciliation, and lifecycle state management.
- Delivered customer-facing and operator-facing dashboards that digitize court scheduling, pricing, memberships, and daily operations for a working venue generating over INR 130,000 (approx. CA\$2,100) in monthly court revenue.

DraftLens | *Next.js, TypeScript, Supabase, OpenAI*

- Built a full-stack academic writing feedback platform with authenticated uploads, rubric-based scoring, citation verification, rewrite suggestions, and persistent report history.
- Designed a structured report workflow that transforms essay analysis into saved, reviewable feedback instead of a single opaque AI response.
- Implemented file-handling pipelines, report persistence, and automated cleanup workflows to deliver a production-style user experience.

EXPERIENCE

Website / Social Media

June 2024 – Present

Quidi Vidi Brewery

St. John's, NL

- Contributed to the design and development of a customer-facing website to improve online sales and strengthen brand visibility.
- Created digital graphics and marketing assets while maintaining consistency with company branding guidelines.
- Collaborated with marketing teams on SEO initiatives, promotions, and social media integrations to improve customer engagement.
- Assisted with ongoing website maintenance, content updates, and design improvements.

EDUCATION

Memorial University of Newfoundland

St. John's, NL

Bachelor of Science in Computer Science

Sept. 2021 – Dec 2025

- Relevant Coursework: Data Structures and Algorithms, Operating Systems, Artificial Intelligence and Machine Learning, Visual Computing, Software Engineering

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, TypeScript, SQL

Web Development: HTML, CSS, Tailwind CSS, React.js, Next.js, Node.js, Express.js

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Firebase

Cloud & Deployment: AWS (EC2, S3, IAM), Docker, Vercel, Netlify, Supabase

Analytics & Visualization: Power BI, Tableau

Backend & APIs: REST APIs, Authentication & Authorization, Stripe Webhooks

Developer Tools: Git, GitHub, Postman, VS Code, Eclipse, Jupyter, Anaconda

Platforms & Integrations: Stripe, Twilio, Progressive Web Apps (PWA)
